Aplicare’s chlorhexidine gluconate is a key multipurpose tool for your infection prevention bundle. CHG’s exceptionally persistent and broad-spectrum antimicrobial properties have led to its recognition as the most effective agent available for patient preoperative skin preparation, surgical hand scrubbing, healthcare personnel handwashing, and as a skin wound and general skin cleanser.

**Aplicare® CHG has faster log reduction and more persistent antimicrobial action vs. Hibiclens® CHG for surgical hand scrubbing.**

### Faster Antimicrobial Action

</table>

Based on independent lab testing using FDA-required Glove Juice Protocol.

### FDA-Approved for the Following Uses:

- **Preoperative Skin Preparation**
- **Surgical Hand Scrub**
- **Healthcare Personnel Hand Hygiene**
- **Skin Wound and General Skin Cleanser**
Chlorhexidine Gluconate Solution, 4% and 2%

A Proven Four-in-One Solution for Infection Prevention

Compliance for Four Key Indications
• FDA-approved and meets CDC, AORN and APIC guidelines for:
  • Preoperative skin preparation
  • Surgical hand scrub
  • Healthcare personnel hand wash
  • General skin and wound cleanser

Fast-Acting Antimicrobial Action
• Kills pathogens on contact, a property that is critical for effective infection control

Broad-Spectrum Efficacy
• Efficacy against MRSA, VRE, multiple MDROs and proven to reduce C. difficile in the ICU¹
• 4% CHG soaps can help remove spores from hands contaminated with C. difficile spores²

• Proven efficacy, meeting the FDA standard for:
  • Patient preoperative skin preparation
  • Surgical hand scrubbing
  • Healthcare personnel hand hygiene
  • Skin wound and general skin cleansing³

Persistent Antimicrobial Action
• CHG bonds with the skin, and has a persistent and residual antibacterial effect for up to six hours for patient preoperative skin preparation and surgical hand scrubbing³

Gentle for Patients and Staff
• Does not contain red dye, which can stain fabrics
• Powerful cleaning: formulated with surfactants to loosen and remove dirt and debris
• 2% CHG formula has been shown to have less irritation potential than Hibiclens® 4% formula
• Liquid does not clog toilets when used for patient preoperative skin preparation

Chlorhexidine Gluconate Solution, 4%
