

# Chlorhexidine Gluconate (CHG): 2% and 4% Solution

Multipurpose Topical Antiseptics for Patient and Staff Protection

Clorox Healthcare’s chlorhexidine gluconate is a key multipurpose tool for your infection prevention bundle. CHG’s exceptionally persistent and broad-spectrum antimicrobial properties have led to its recognition as an effective skin antisepsis agent for both patients and hospital staff.

## Competitive Efficacy vs. Hibiclens for FDA-Approved Usage Occasions

Product	Surgical Hand Scrubbing	Preoperative Skin Preparation	Healthcare Personnel Handwashing	General Skin and Wound Cleanser
Clorox Healthcare™ 4% CHG vs. Hibiclens® 4% CHG	Faster and More Persistent	Parity	Parity	Parity

### FDA-Approved for Four Indications

- Preoperative skin preparation
- Surgical hand scrub
- Healthcare personnel hand wash
- General skin and wound cleanser

### Fast Acting and Persistent Antimicrobial Action

- Kills pathogens quickly<sup>1</sup>
- CHG has a persistent and residual antibacterial effect for up to six hours for patient preoperative skin preparation and surgical hand scrubbing<sup>2</sup>

### Ease of Use for Patients and Staff

- Does not contain red dye, which can stain fabrics
- Formulated with surfactants to loosen and remove dirt and debris
- 2% CHG formula has been shown to have less irritation potential than Hibiclens® 4% CHG formula

### Broad-Spectrum Efficacy

- Efficacy against MRSA

### Value

- Lower in price than the leading CHG bottle manufacturer
